ABOUT FIMO®

Our Vision, Our Mission, Our Values

▲ WALL ENTRIES
Solutions for Shelter and Masonry

▲ TELECOM INFRASTRUCTURE
Cable Clamps and
Grounding Kits Solutions

TRADITION AND MODERNITY

In a constantly evolving market, such as Telecommunications, FIMO Group is committed to always provide customers with "on purpose" studied, designed and manufactured components. All FIMO solutions, aimed at solving any possible installation problem, are fully supported by a continuous efforts and investment into research and development, technology innovation, manufacturing process optimization and excellence in execution.

With over 80 years of history and experience, a significant geographical presence, the Group is strongly positioned at the high-tech end of the telecom accessories sector.

FIMO has solid technical and ethical foundations and his business approach is a perfect blend of family tradition and managerial modern vision.

OUR VISION, OUR MISSION, OUR VALUES
The FIMO Group's vision and mission provide the fundamental engine of our daily engagement. Our values drive our commitment to customers and work.

Our vision

We believe in the efficient and sustainable telecommunication infrastructure as a pri-

mary driver in the international integration.

Our mission

We provide our customers with always-innovative solutions based on state-of-the-art technology, manufacturing cycle's optimization and services' excellence.

Our values

Innovation – every day we pursue innovation in all we do.

Intuition – we listen our customers to properly identify their real needs.

Straightness – we preserve consistency and ethical behaviour in all our actions.

Radiating Cable Fixings Solutions

OUR CUSTOMERS ... OUR FOCUS

FIMO has established strong relationships with the major players in the Telecommunication industry thanks to a unique understanding capability of their primaries needs. Customer centricity, guaranteed by ensuring that customers are always at the centre of FIMO business's philosophy, operations and ideas, is a constant behaviour of the Group and is reflected from product design through to delivery, and provision of a constantly monitored level of service.

SUPPORTING THE SUSTAINABLE DEVELOPMENT OF THE WORLD'S TELECOM INFRASTRUCTURE

The FIMO Group's solutions are designed to support the development of the world's telecoms infrastructure. Supporting the infrastructures of many of the world's leading telecoms operators, the FIMO Group delivers solutions that help link communities around the globe.

Our business is made up of five business units – Telecom Solutions, Broadcasting Solutions, Fibre Optics Solutions, FTTA Solutions and Kitting Solutions.

Telecom Solutions

This business covers the main product sectors of coaxial and radiant cable accesso-

ries. FIMO offers a comprehensive range of products, services and the knowledge required to meet the increasing demands of our customers in terms of quality, efficiency and cost-effectiveness.

Broadcasting Solutions

The importance of transmission line quality is easily overlooked when planning a broadcasting site. Regardless of the chosen line, FIMO accessories will significantly support the system's overall performance and expansion capabilities.

Fibre Optic Solutions

Economic growth, entertainment, employment, e-learning and e-health depend more and more on fibre networks. Broadband is creating new lifestyle choices and stimulating economies everywhere.

Access to fast communication networks is vital to homes and businesses in rural and urban communities.

Responding to this demand FIMO offers a comprehensive array of fibre optic cables installation accessories to assist all customers in fibre-based networks implementation. Whether you are supporting Fibre-to-the-Antenna, DAS, or data centre, FIMO's fibre optic cable accessories portfolio is designed to meet your needs.

FTTA Solutions

The connection between the base station and remote radio unit is the key to the quality of the data transmission to the end user. Our extensive experience in the fibre-optic technology field, innovative product development and our long-term co-operation with the leading OEMs and network operators in the telecommunication sector enables us to develop the next generation of universal, FTTA cabling systems.

OUR PEOPLE ... OUR STRENGTH

FIMO strongly relies on the expertise of its people to provide valuable solutions and services to all major customers involved in projects on every continent.

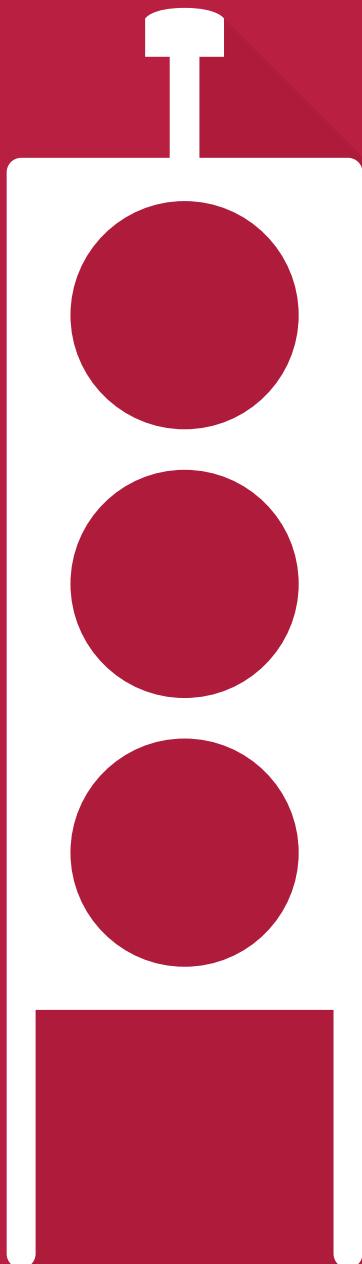

Our people are our most valuable asset and we are continuously investing in their capabilities, training and expectations.

We strongly support the value of teamwork and we consider the quality of our human resource management as fundamental to the success of our business.

Cable Clamps & Fastening Devices

Product Catalogue

Cable Clamps

Cable clamps for coaxial, fiber optic and power cables. FIMO cable clamps are suitable for a quick, safe and secure installation of cables and pipes on any kind of support.

Fissacavi per cavi coassiali, fibra ottica e energia. I fissacavi FIMO sono adatti per l'installazione rapida e sicura di cavi o tubi su qualsiasi tipo di struttura.

Cable Clamps

MATERIAL

Metal Parts	AISI 304 Stainless Steel
Saddle	Fiberglass P.P. U.V. Resistant
Colour	Black

UMO-UMC-UML
Twin Coaxial Cable Clamps

Versions:

- **UMO** for flat iron with holes
- **UMC** for flat, round, angular
- **UML** for steel wire cable trays

Components:

1. SEB double saddles made of fiber-glass reinforced P.P.
2. Threaded bar - **BFI M8** (**M10** on request)
3. **DAI 8** Hexagonal Nuts
4. **REI 8** Elastic Washers

Use:

Fixing 1 to 8 coaxial cables.

GRE-GRQ-GRR elastic cushions allow fastening of waveguides.

Options:

Available upon request threaded bar, nuts and washers M10 and 3/8".

UMO-UMC-UML
Fissacavi Doppi per Cavi Coassiali

Versioni:

- **UMO** per piatto forato
- **UMC** per piatto, tondo e angolare
- **UML** per passerelle portacavi in filo d'acciaio

Composizione:

1. Selle doppi **SEB** di P.P. rinfornzato vetro
2. Barra filettata - **BFI M8** (**M10** a richiesta)
3. Dadi esagonali **DAI 8**
4. Rondelle elastiche **REI 8**

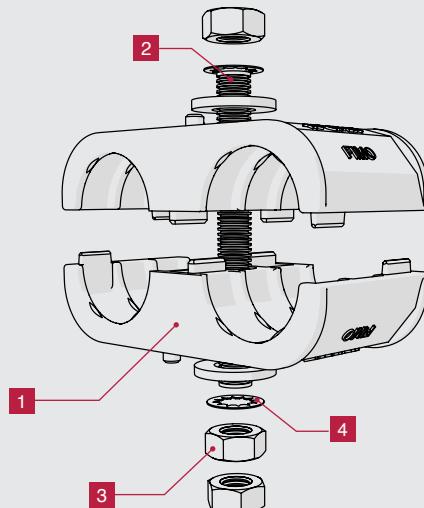

Impiego:

Fissaggio 1 - 8 cavi coassiali.

Fissaggio di guide d'onda mediante guarnizioni elastiche **GRE-GRQ-GRR**.

Opzioni :

Disponibili su richiesta barra filettata, dadi e rondelle M10 e 3/8".

Calibrated Double Saddles

MATERIAL

Saddle	Fiberglass P.P. U.V. Resistant
Colour	Black

SEB - Calibrated Twin Saddles

The internal indentation allows the cable grip without compressing or deforming it. The two saddles fitting is calibrated and corresponds to the diameter of the coaxial cables.

SEB - Selle Calibrate Gemellate

Grazie alla dentellatura speciale interna fanno presa sul cavo coassiale senza comprimerlo né deformato.
La chiusura di due selle abbinate è calibrata sui diametri dei cavi coassiali.

Mini Cable Clamps

**MCO-MCC-MCL**

Universal Mini-Clamps for RF, RG, and FO

Versions:

- **MCO** for flat iron with holes
- **MCC** for flat, round, angular
- **MCL** for steel wire cable trays

Components:

1. **SAC** Calibrated double Saddles P.A. 6
2. Threaded bar - **BFI M8**
3. **DAI 8** Hexagonal Nuts
4. **RPI** Washers
5. Flexible Hinge

Use:

Fixing 1 to 6 coaxial cables.
Fixing for RG and FO cables.

Options:

Available upon request threaded bar, nuts and washers M10 and 3/8".

MCO-MCC-MCL*Mini Fissacavi Universali per RF, RG e FO***Versioni:**

- **MCO** per piatto forato
- **MCC** per piatto, tondo e angolare
- **MCL** per passerelle portacavi in filo d'acciaio

Composizione:

1. Bi-Sella calibrata **SAC** di P.A. 6
2. Barra filettata - **BFI M8**
3. Dadi esagonali **DAI 8**
4. Rondelle piane **RPI**
5. Cerniera flessibile

Impiego:

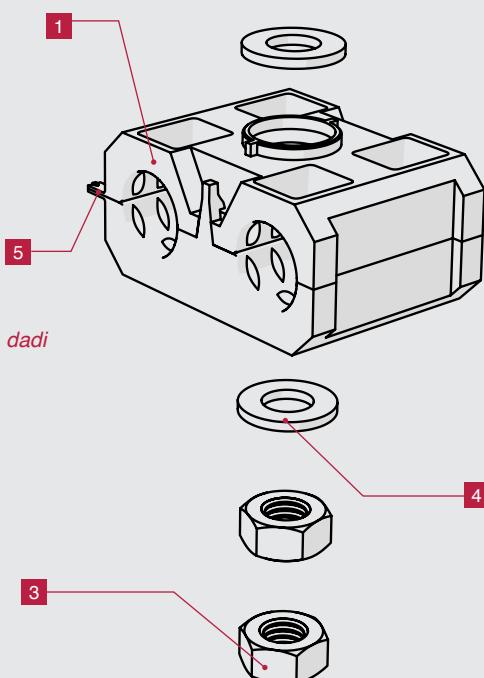

Fissaggio 1 - 6 cavi coassiali.
Fissaggio di cavi **RG e FO**.

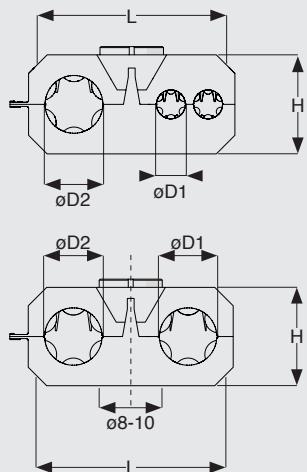

Opzioni :

Disponibili su richiesta barra filettata, dadi e rondelle M10 e 3/8".

MATERIAL

Metal Parts	AISI 304 Stainless Steel, P.A. 6, U.V. Resistant
Colour	Black (Grey on Request)

**SAC - Calibrated Double Saddles with Flexible Hinge for RF, RG and FO****SAC - Bi-selle Calibrate con Cerniera Flessibile per RF, RG e FO**

SAC Mini double saddles are used for small diameter cables.

They consist of two hinged calibrated half saddles that snap down on **couples of cables**, remaining blocked on the cables to be fixed.

The two cables, can be led to the fixing point and finally blocked there through **M8/M10 threaded bars and screws, or sRF Cable Clamps**.

Cables are gently held, thanks to the internal special geometry of the saddles. They are specially recommended for **RG** and **FO cables**.

Le miniselle doppie **SAC**, destinate al fissaggio di cavi di piccolo diametro, sono costituite da due semiselle calibrate incernierate tra loro. Vengono chiuse a scatto su una **coppia di cavi**, restandovi bloccate. I due cavi, così trattenuti, vengono trascinati al punto di fissaggio ed ivi bloccati definitivamente mediante **viti e perni filettati M8/M10, o morsetti fissacavi sRF**.

I cavi sono trattenuti delicatamente grazie alla particolare geometria interna delle miniselle **SAC**.

Sono particolarmente raccomandate per cavi **RG e FO**.

Mini Cable Clamps

**MMO-MMC-MML**

Universal Mini-Clamps for RF, RG, and FO

Versions:

- **MMO** for flat iron with holes
- **MMC** for flat, round, angular
- **MML** for steel wire cable trays

Components:

1. SEC Calibrated double Saddles P.A. 6
2. Threaded bar - **BFI M8**
3. DAI 8 Hexagonal Nuts
4. RPI Washers

Use:

Fixing for POWER and FO cables.

Options:

Available upon request threaded bar, nuts and washers M10 and 3/8".

MMO-MMC-MML

Mini Fissacavi Universali per RF, RG e FO

Versioni:

- **MMO** per piatto forato
- **MMC** per piatto, tondo e angolare
- **MML** per passerelle portacavi in filo d'acciaio

Composizione:

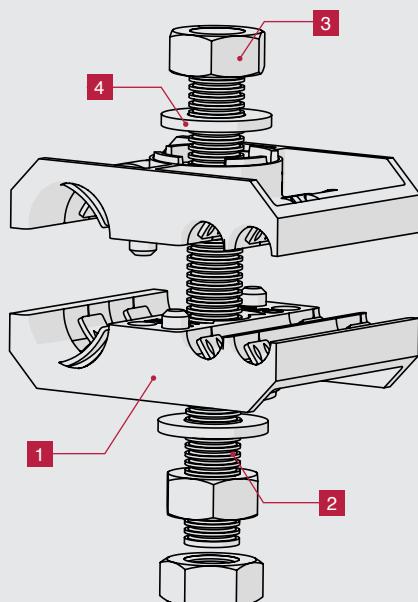

1. Bi-Sella calibrata **SEC** di P.A. 6
2. Barra filettata - **BFI M8**
3. Dadi esagonali **DAI 8**
4. Rondelle piane **RPI**

Impiego:Fissaggio di cavi **POWER e FO**.**Opzioni :**

Disponibili su richiesta barra filettata, dadi e rondelle M10 e 3/8".

Saddle	P.A. U.V. Resistant
Colour	Black

SEC - Double Saddles for a Wide Range of Cable's Diameter

SEC mini saddles are used for small diameter cables. The innovative design of the saddle allows the fixing of cables with a wide range of diameters.

The two saddles fitting corresponds to the diameter of a wide range of POWER and FO cables.

SEC - Bi-selle per un'ampia gamma di diametri dei cavi

Le miniselle SEC sono utilizzate per i cavi di piccolo diametro. Il design innovativo delle selle permette il fissaggio dei cavi con un'ampia gamma di diametri.

La chiusura di due selle abbinata si adatta al diametro di un'ampia gamma di cavi POWER e FO.

- **FAST AND SAFE CABLE FIXINGS**
Two locking devices allow a fast and safe cable fixings without any hardware and tools

- **SLIDE IN SYSTEM**•
Two slides allow the stack up of other SDS saddles without any hardware and tools

No Tools Stackable Double Saddles

SDS - No Tools Stackable Double Saddles

SDS no tools stackable double saddles are used for small diameters cables.

SDS consists of a central body and fasteners for a quick side insertion of cables. Locking devices prevent accidental exit of cables from its housing.

The central body can be connected with a M8 screw to any type of clamp (**MAM 8, MBM 8, MIM 8**) or socle (**BAM, BOM**).

Two slides on the central body allow the stack up of other SDS saddles without any hardware like threaded bars, washers and nuts.

The side fasteners and locking devices allow a fast and safe fixing of power and fiber optic cables without the use of tools.

SDS - Selle Gemellate Impilabili, Installazione senza utensili

Le selle gemellate impilabili SDS sono usate per i cavi di piccolo diametro.

Le selle SDS sono composte da un corpo centrale e da fissacavi per un rapido inserimento laterale dei cavi.

I dispositivi di chiusura prevengono l'uscita accidentale dei cavi dalla loro sede.

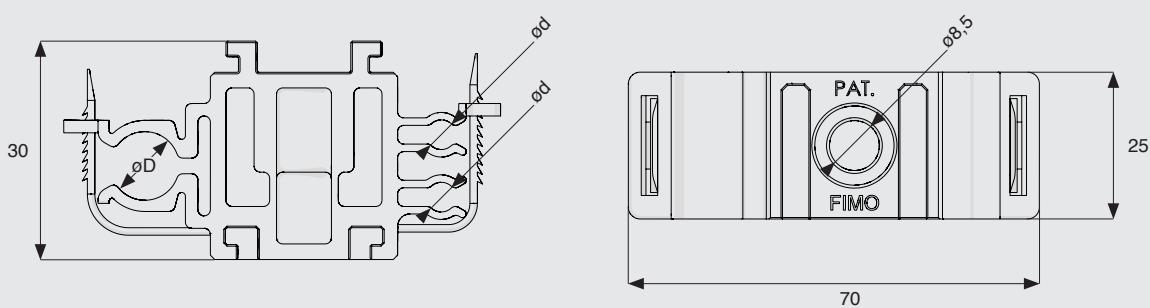

*Il corpo centrale può essere connesso con una vite M8 a ogni tipo di morsetto (**MAM 8, MBM 8, MIM 8**) o basetta (**BAM, BOM**).*

Due slitte ricavate nel corpo centrale permettono di impilare altre selle SDS senza l'utilizzo di mezzi di collegamento come barre filettate, rondelle e viti.

I fissacavi laterali e i dispositivi di chiusura permettono un fissaggio veloce e sicuro di cavi elettrici e fibre ottiche senza l'uso di utensili.

SRR

Round Reduction Cushions for a wide range of cables' diameters.

SRR round reduction cushions allow a safe fixing of coaxial, fiber optic and power cables with a wide range of diameters.

They consist of two hinged half cushions with an innovative internal structure designed to be easily shaped around cables with a wide range of diameters. SRR round cushions guarantees a secure locking of cables, protecting cable and its jacket.

Two cushions are covering the entire diameter's range (4-32 mm / .157 -1.260 inches) of fiber optic and power cables.

SRR round reduction cushions can be combined either with **SIC** snap-in cable clamps or with **SEB** calibrated double saddles.

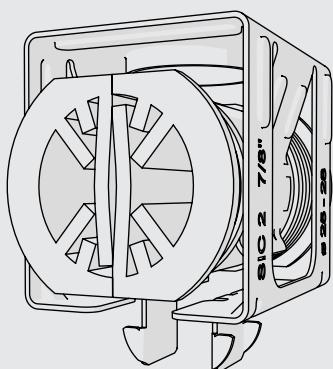

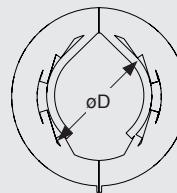

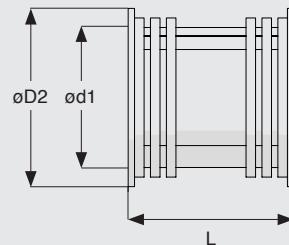

SRR

Guarnizioni tonde di riduzione per un'ampia gamma di diametri dei cavi.

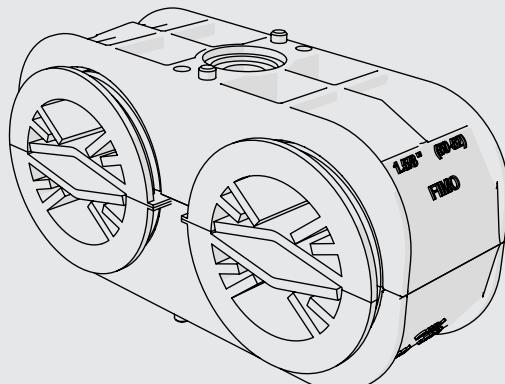

Le guarnizioni SRR permettono un fissaggio sicuro di cavi coassiali, fibra ottica e energia con un'ampia gamma di diametri.

Esse sono composti da due semi-guarnizioni incernierate reciprocamente con una struttura interna innovativa ideata per essere facilmente modellata attorno ai cavi con un'ampia gamma di diametri. Le guarnizioni SRR garantiscono un bloccaggio sicuro dei cavi proteggendo il cavo e la sua guaina esterna. Due guarnizioni permettono di coprire l'intera gamma di diametri (4-32 mm/.157-1.260 pollici) dei cavi fibra ottica e energia.

*Le guarnizioni SRR possono essere combinate sia con i fissacavi rapidi **SIC** che con le selle calibrate gemellate **SEB**.*

BAP - Plastic Socle for BFI 10 Threaded Bars

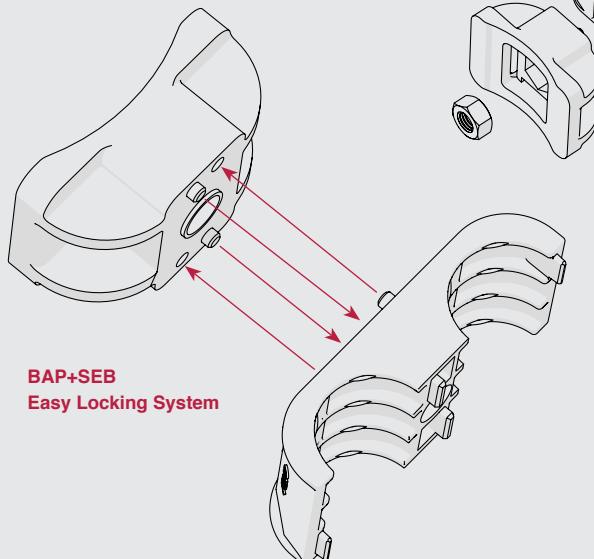

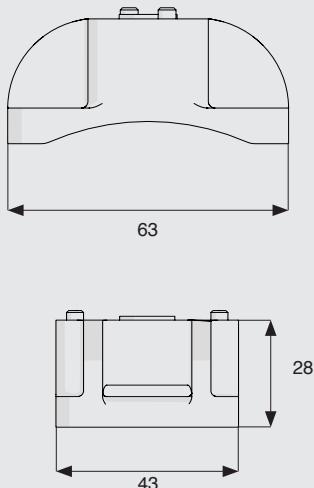

BAP 10 plastic socle can be applied with **BIT19** strips or **FAS** and **FAU** hose clamps to various structures like poles and pylons.

Its design allows the installation of **SEB** saddles using a **BFI 10** threaded bar and **DAI 10** nuts.

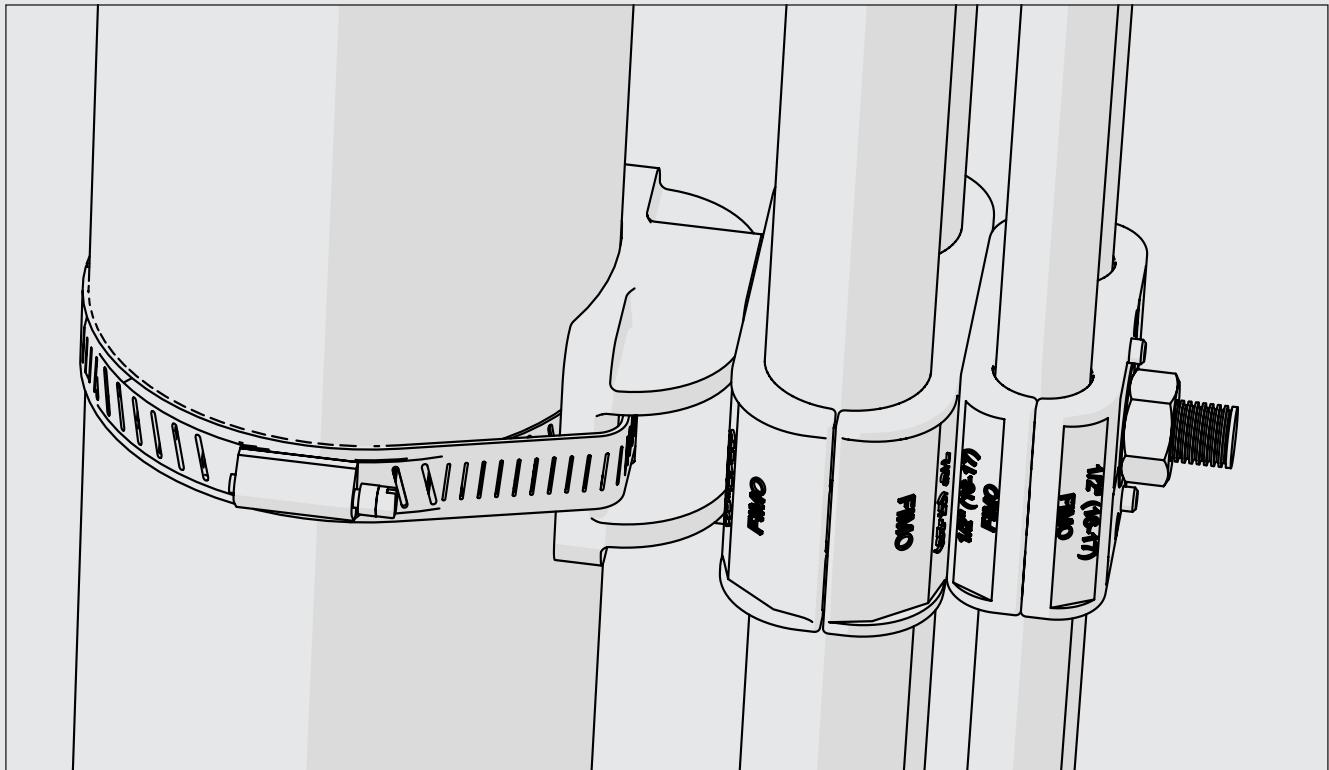

BAP - Basetta in plastica per barre filettate BFI 10

Le basette in plastica BAP 10 vengono fissate con i nastri **BIT 19** o con le fascette **FAS** e **FAU** a strutture varie come pali e tralicci.

Il suo design permette l'installazione delle selle **SEB** utilizzando la barra filettata **BFI 10** e i dadi **DAI 10**.

WPE- Waterproofing Enclosure
For Coaxial Cable Applications

The WPE is a gel closure sealing system that provides a reliable sealing of coaxial connectors used at the transition between:

- JUMPER and ANTENNA
- JUMPER and FEEDER CABLE

exposed to the outside environment. The housing contains an innovative gel material and provides an efficient moisture block. The ease of installation and long-term protection makes it reliable and cost effective solution.

FEATURES & BENEFITS

- Quick and Easy installation
- No need special training
- Easy removable and reusable
- Wraparound and no disconnection of the connector
- No tape, no mastics or tools required for installation and removal

Operating temperature range: -40 °C / +65 °C
Storage temperature range: -40 °C / +65 °C

WPE- Sistema di Sigillatura per Connettori
Per Applicazioni con Cavi Coassiali

I WPE sono dei sistemi di sigillatura con gel che garantiscono una tenuta stagna dei connettori usati nelle connessioni tra:

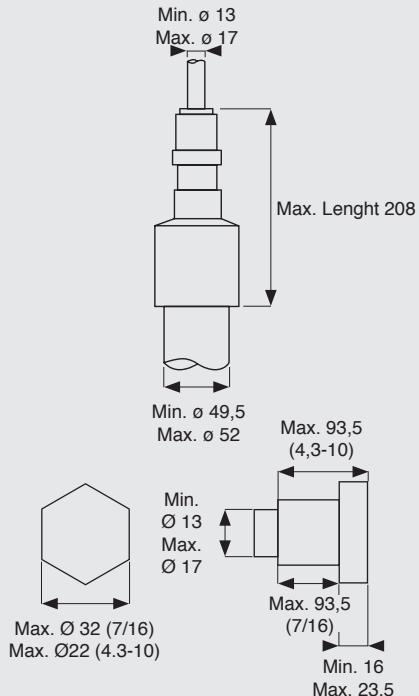

- JUMPER e ANTENNA
- JUMPER e CAVO COASSIALE

esposti agli agenti atmosferici. Il guscio di plastica racchiude un gel innovativo che provvede adeguata tenuta all'umidità. La facilità d'installazione e una protezione di lunga durata fanno del WPE una soluzione affidabile e conveniente.

SPECIFICHE & BENEFICI

- Installazione semplice e veloce
- Addestramento specifico non necessario
- Facilmente removibile e riutilizzabile
- Avvolgente e senza rischio di disconnessione del connettore
- Per l'installazione e la rimozione non sono richiesti nastri, mastici o utensili

Temperatura di esercizio: -40 °C / +65 °C
Temperatura di stoccaggio: -40 °C / +65 °C

Cold Shrink Tube

MATERIAL

Tube	Silicone/ EPDM rubber*
Colour	Black

* TEF 28 - TEF 50: EPDM

TEF - Cold Shrink Tube

TEF cold shrink tubes are a series of open-ended tubular silicone/EPDM rubber sleeves, pre-expanded on a removable core for easy installation. After the core is removed, the tube shrinks to its original diameter guaranteeing a perfect sealing on connectors. In applications where the different cable diameter cannot be covered with the tube range, a special foam is included in the package. The strip foam is used to increase the smaller cable diameter and assure the sealing of the cold shrink tube.

Application

Sealing of feeder connections. TEF offers a timesaving and easy way to secure a waterproof protection. No tools or heating are required for installation. The shrinking process is done by simply unwinding the removable core.

TEF - Tubolari Retraibili a Freddo

I tubolari retraiibili a freddo TEF sono una serie di manicotti in silicone/EPDM aperti agli estremi, pre-espansi su un cilindro removibile per una facile installazione. Dopo che il cilindro viene rimosso, il manicotto si retrae fino alla sua diametro originale garantendo una perfetta sigillatura dei connettori. Nelle applicazioni dove la differenza dei diametri dei cavi non può essere coperta dall'escursione del manicotto, uno speciale nastro di gomma espansa è incluso nella confezione. Il nastro di gomma espansa viene usato per aumentare il diametro del cavo minore e garantire la sigillatura del tubolare retraiibile a freddo.

Applicazioni:

Sigillatura di connessioni. I TEF offrono una soluzione rapida e sicura per una protezione stagna. Né utensili né riscaldamento a mezzo di fiamma sono richiesti per l'installazione. Il processo di restringimento avviene semplicemente svolgendo il cilindro removibile.

*After shrinking, without foam strip

**For smaller diameter cables, use the included round rubber cushion
